GARMIN GARMIN GARMIN

The top row features three large Garmin multifunction displays. The left display shows engine gauges (RPM, EGT, oil pressure) and a primary flight display (PFD) with attitude, altitude, and airspeed indicators. The center display shows a weather radar and terrain display with various weather symbols and terrain shading. The right display shows engine gauges and a PFD similar to the left display.

The middle section contains two side-stick controllers with blue grips and red stitching, mounted on a central console. Below the sticks are two smaller Garmin displays showing a grid of icons for various aircraft systems and settings. The central console also features a landing gear selector and a flap selector.

The lower fuselage area shows the seats with blue leather upholstery and red stitching. A central console is located between the seats, featuring a handbrake, a parking brake, and a seatbelt buckle. The floor is covered with a dark carpet.
